

Latex Tutorial 7 (Formatting) Examples

Andrew Roberts

29th September 2003

1 Text Formatting

1.1 Quotes

To <code>'quote'</code> in Latex.	To ‘quote’ in Latex.
To <code>''quote''</code> in Latex.	To “quote” in Latex.
To <code>''quote''</code> in Latex.	To “quote” in Latex.

1.2 Dots and Dashes

<code>Ellipsis...</code>	Ellipsis...
<code>Ellipsis \ldots</code>	Ellipsis...

Input	Output	Purpose
<code>-</code>	-	inter-word
<code>--</code>	-	page range, 1–10
<code>---</code>	—	punctuation dash — like this

1.3 Accents

Command	Output	Command	Output
<code>\' {o}</code>	ò	<code>\' {o}</code>	ó
<code>\" {o}</code>	ö	<code>\H {o}</code>	õ
<code>\^ {o}</code>	ô	<code>\~ {o}</code>	õ
<code>\v {o}</code>	ö	<code>\= {o}</code>	ō
<code>\b {o}</code>	ò	<code>\. {o}</code>	ó
<code>\d {o}</code>	ò	<code>\c {o}</code>	ç
<code>\r {o}</code>	ò	<code>\t {oo}</code>	ôö
<code>\i</code>	ı		

1.4 Symbols

Command	Symbol	Command	Symbol
\%	%	\#	#
\\$	\$	\&	&
\{	{	\}	}
_	-	\S	§
\P	¶	\dag	†
\ddag	‡	\textbackslash	\
\textbar		\textless	<
\textgreater	>	\textemdash	—
\textendash	–	\textregistered	®
\texttrademark	™	\textquestiondown	¿
\textexclamdown	¡	\textcircled{a}	Ⓐ
a	^a	\copyright	©
\pounds	£		

1.5 Emphasizing Text

I want to *emphasize* a word.

1.6 Font styles

Command	Style
\textnormal{...}	document font family
\emph{...}	<i>emphasis</i>
\textrm{...}	roman font family
\textsf{...}	sans serif font family
\texttt{...}	typewriter font family
\textup{...}	upright shape
\textit{...}	<i>italic shape</i>
\textsl{...}	<i>slanted shape</i>
\textsc{...}	SMALL CAPITALS
\textbf{...}	bold
\textmd{...}	normal weight and width

Using the ulem package, it is possible to underline words, add under-wave and ~~strike-out~~.

1.7 Font sizes

Command	Output
<code>\tiny</code>	sample text
<code>\scriptsize</code>	sample text
<code>\footnotesize</code>	sample text
<code>\small</code>	sample text
<code>\normalsize</code>	sample text
<code>\large</code>	sample text
<code>\Large</code>	sample text
<code>\LARGE</code>	sample text
<code>\huge</code>	sample text
<code>\Huge</code>	sample text
